# GAURAV KESWANI

**Staff Frontend Engineer**

Noida, India · +91 9598007940 · gauravcs0062@gmail.com · linkedin.com/in/learnwithgaurav

## PROFESSIONAL SUMMARY

**Staff Engineer with 7+ years** of experience building high-traffic, server-rendered e-commerce applications with **React, Next.js and Node.js**. Specializes in frontend architecture and web performance. Led a platform-wide optimization that made the website **3x faster under peak load** and modernized the frontend stack across **20+ micro-frontend repositories**. Brings full-stack depth in Node.js BFF services and AWS serverless, a strong record in security and production reliability, and hands-on **AI-assisted engineering** that improves team productivity.

## CORE COMPETENCIES

| | |
|---|---|
| **Frontend Architecture** | React.js, Next.js, Redux (State Management), Micro-Frontends, Design Systems |
| **Performance Engineering** | Server-Side Rendering (SSR), Core Web Vitals, Code Splitting, Lazy Loading |
| **Languages & Styling** | JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, Responsive Design, i18n, SEO |
| **Build & Quality** | Webpack 5, Babel, Unit Testing (Jest, React Testing Library), WCAG 2.1, ESLint |
| **Backend & Cloud** | Node.js, Express, REST APIs, BFF, AWS (Lambda, S3, SSM, Secrets Manager) |
| **AI-Assisted Engineering** | Claude Code, AI agent skills, prompt engineering, AI chatbot integration |
| **DevOps & Observability** | Git/GitHub, Jenkins CI/CD, Kubernetes, Lighthouse, Dynatrace, Splunk, JMeter |
| **Ways of Working** | Agile/Scrum, Code Review, Figma, Cross-Functional Collaboration, Documentation |

## PROFESSIONAL EXPERIENCE

**Staff Engineer** December 2025 – Present
Nagarro *Noida, India*

- **Led a platform-wide performance initiative** across the Next.js SSR layer and BFF services, making the website **3x faster under peak load** and raising order throughput by **67%** in load tests.
- **Resolved recurring server crashes** during peak sales and fixed a concurrency defect that could expose one user's data to another, enabling **stable, zero-downtime releases**.
- **Built and shared reusable AI agent skills** that automate repetitive work such as dependency vulnerability fixes, **speeding up delivery** and making fixes consistent across the team.
- **Led a security audit remediation across 11 repositories**. Removed hard-coded secrets, moved them to a secure cloud parameter store and rotated credentials with zero downtime.
- **Rolled out the Node.js 18 upgrade across 20+ repositories**, from proof of concept to production, and resolved critical dependency vulnerabilities.
- **Delivered a multi-step digital KYC onboarding journey** in React and Node.js, with document upload, bank verification and shareable referral links.
- **Integrated an AI chatbot** with session-aware context and a new **UPI payment gateway**. Built a self-service script that lets L2 support **resolve recurring incidents without developers**.

**Associate Staff Engineer** March 2024 – November 2025
Nagarro *Noida, India*

- **Led the build upgrade to Webpack 5 and Next.js 12**, with a custom Webpack configuration, Dart Sass and updated Babel transpilation across all micro-frontends.
- **Integrated recurring AutoPay subscription payments** end to end: mandate setup, payment methods, scheduled dates and success or failure handling.
- **Built loyalty-program dashboards** for individual and team performance, with search, filters, progress tracking and report downloads for web and mobile app.
- **Delivered omnichannel product labels across 10+ pages** (home, listing, product, cart, search, wishlist), plus promotions, product-list sharing and sorting.
- **Owned a serverless document-generation service** on AWS Lambda for tax-compliant invoices and digitally signed contracts.
- **Standardized code formatting** across all repositories and handled **P1/P2 production incident** analysis and hotfixes.

**Senior Engineer** March 2022 – March 2024
Nagarro *Noida, India*

- **Built customer-facing React features from Figma designs** for subscriptions, cart, checkout, rewards and product discovery on a Next.js micro-frontend platform.
- **Fixed site-wide image quality and stretching issues** and moved to optimized image components across home, listing and product pages.
- **Implemented rewards-points calculation logic** (earn, redeem, lock, expiry) and the related account and order-history journeys.
- **Contributed to the shared component library** and style guide used by all micro-frontends, keeping the UI consistent.
- **Managed monthly production releases across 12+ repositories** and delivered **SEO** and multilingual **(i18n)** content improvements.

**Senior Systems Engineer · Systems Engineer** September 2019 – March 2022
Infosys *India*

- **Built reusable UI components** (custom data grid, notification modules) as frontend plugins for an enterprise content management system.
- **Coordinated a 4-developer squad** and met **100% of sprint goals** across multiple releases. Improved velocity by about **20%** through Agile sprint planning.
- **Reduced change requests by about 40%** through daily client alignment on requirements, and raised unit test coverage to **85%**.

## KEY INITIATIVES

**Platform Performance Program** — *Next.js, Node.js, Dynatrace, JMeter*

- Found bottlenecks with load tests and production traces, then delivered parallel data fetching, shared-content caching and connection reuse, making the site **3x faster**.
- Wrote **performance guidelines and a pull-request checklist** that the team adopted so these regressions do not come back.

**AI Agent Skills for Engineering** — *Claude Code, Prompt Engineering*

- Created and shared AI agent skills that handle routine tasks **end to end (analysis, fix, test, pull request)**, making the team faster and fixes more consistent.

## TECHNICAL LEADERSHIP & IMPACT

- **Code Review:** Authored **960+ pull requests** and reviewed **150+** across 20+ repositories, enforcing performance and security standards.
- **Knowledge Sharing:** Wrote technical documentation (performance guides, runbooks, system flows) that the wider team uses.
- **Cross-Functional Collaboration:** Works with product, design, QA and SRE teams in Agile/Scrum sprints, from requirements to production.

## EDUCATION

**B.Tech, Computer Science & Engineering** — United College of Engg. & Research, Prayagraj 2015 – 2019
**Summer Internship, IoT, Drones & Geospatial Technologies** — Asian Institute of Technology, Thailand 2018

## ACHIEVEMENTS & RECOGNITION

- **Career Growth:** Promoted twice at Nagarro, from Senior Engineer to Associate Staff Engineer to Staff Engineer.
- **AI Singularity Hackathon:** 2nd Runner-Up, Nagarro. Earned **3 technical medals and 15 assessment badges** at Nagarro.
- **Delivery Excellence:** Project Execution Excellence award (3 consecutive years); Infosys Insta Award; Infosys Certified Front-End Web Developer and Quality Certified Engineer.
